

PURE EO CARTRIDGES 100% Ethylene Oxide

Correct and measured dosage suitable for the size of sterilizer, assures secure sterilization every time and hence no chance of over dosage which can lead to residual EO or under dosage which can lead to sterilization failure.

1. Small but correct amount of E.O present in each cartridge adds to safety.
2. Transportation and Handling expenses reduced drastically .
3. Faster turn around time.
4. 100 % E.O cartridge assures no depletion of ozone layer.
5. No external piping or valve systems which are a potential gas leak hazard.
6. Designed to be compatible with most commercially available sterilizers.

A readymade solution for gas sterilization using the optimum required gas quantity in disposable single use cartridges. Ensuring correct dosage every time with easy and convenient handling and safety of use. Our cartridges are manufactured using excellent materials & under our strict quality guidelines which oversee all our manufacturing processes. Our Post Production Inspection & Testing ensures all our cartridges conform to the specifications provided by us consistently. The minimum shelf life for our cartridges is thirty six months from the date stamped on the cartridge and on the label of each box.

40 GRAMS SafEo Cartridges

A tidy, small and effective gas cartridge used mostly by clinics and small hospitals - suitable for E.O. gas sterilizers having a chamber volume upto 80 litres.

100 GRAMS SafEo Cartridges

A mid size and effective gas cartridge used mostly by small hospitals and small medical device industries - suitable for E.O. gas sterilizers having a chamber volume upto 150 litres.

170 GRAMS SafEo Cartridges

A large sized and effective gas cartridge used mostly by multispeciality hospitals and mid sized medical device industries - suitable for E.O. gas sterilizers having a chamber volume upto 300 litres.

340 GRAMS SafEo Cartridges

An extra large sized and effective gas cartridge used mostly by large multispeciality hospitals and bulk medical device manufacturers - suitable for E.O. gas sterilizers having a chamber volume upto 680 litres.

420 GRAMS SafEo Cartridges

A variant of the 340 grams- extra large sized and effective gas cartridge used mostly by medical device manufacturers manufacturing long term invasive products and suitable for E.O. gas sterilizers having a chamber volume upto 680 litres.
